

Important information to keep

Operation

LED ring underneath

Boiling water: Push – push – turn

Chilled water*: Push – wait – turn

Sparkling water*: Push – turn

LED ring on top

Boiling water: Push – push – turn

Chilled water*: Turn to the first click

Sparkling water*: Turn to the second click

*Only available if a CUBE is installed

First use

First flush the system of boiling water for two minutes until the water runs clear.

Operating tips

Hold your cup close to the spout to prevent splashing.

Indication light

The LED ring will come on when the water in the tank is heating up. This will happen after each use and also several times throughout the day to maintain the temperature.

Cleaning the tap aerator

If you notice that the flow of boiling water slows down, remove the nozzle and soak the aerator in cleaning vinegar for about an hour. Then rinse off the limescale and screw the nozzle with the aerator inside, back onto the tap.

Cleaning the tap

Go to our website for cleaning instructions.

Please note: Cleaning tools and agents including dishwashing brushes, scouring sponges, all-purpose cleaning agents, scale removers, acidic agents, and solvents may damage the tap.

Maintaining the tank

If your Quooker system, after the aerator has been cleaned, still does not provide an optimal flow of boiling water, limescale may have built-up in the tank. If this is the case, please contact our service team by completing the service contact form in your **My Quooker account**. Alternatively, you can install a suitable descaling system. See our website for more details.

Register your Quooker

There is a 2 year warranty period on Quooker products. Scan the QR code or go to **quooker.co.uk/my-quooker** to register your Quooker system. This also allows us to help you quicker if you have any questions.

Still have questions?

If you have any questions or a problem with your Quooker, go to quooker.co.uk or use our self-service at **quooker.co.uk/self-service**.

If the answer to your question is not on our website, log in to your **My Quooker account** or easily create an account to contact our service department.

**We hope that you enjoy
your Quooker!**
